EXPERIENCE

IBM, June 2025 – Present, Austin, TX

UX designer, IBM Power Design Team

- Designed agentic AI platform for system admins, working with developer and PM partners to deliver a comprehensive platform in less than a year
- Engaged with over 100 customers at IBM client conference, collecting 140+ written comments via activities I created to support future design and strategy work
- Served as leader on team for AI design tooling adoption as well as a mentor for a summer intern

IBM, May 2024 – August 2024, Austin, TX

Designer Intern, IBM Power Design Team

- Conducted three competitive analyses to validate IBM Power's product roadmap, leading to the creation of a new hill (product value statement)
- Migrated Sketch components to Figma, updating them to the current version of IBM's design system while also designing new components and templates to improve designer efficiency
- Co-managed event programming for a worldwide cohort of around 29 design interns

IBM, May 2023 – August 2023, Chicago, IL

Innovation Designer Intern

- Organized team of designers, developers, and data scientists for an AI financial advisor project for internal hackathon, working with designers on the user interface using Figma
- Taught design team how to use Figma and IBM's design system

Optimal Assessment, January 2023 – May 2025, Syracuse, NY

UX Designer

- Designed a minimum viable product using Figma for an educational technology platform to assist professors in creating courses for diverse learning styles
- Won first place and \$4000 in business pitch competition alongside partner
- Conducted user research through interviews, surveys, usability testing, and secondary research

CuseHacks, September 2022 – May 2025, Syracuse, NY

Designer

- Rebranded a hackathon with a new brand strategy, logo, colors, typography, and brand collateral
- Revitalized inactive Instagram account by designing posts to build excitement, grow brand presence, and communicate event information, resulting in a 4.5% increase in followers
- Designed new website using Figma and collaborated with a developer to code the site
